

Editor's Note

It is with great pleasure that we publish this special issue on “Flow Control Topics in Automotive Flows” edited by our Guest Editor Prof. Sinisa Krajinovic. It provides a glimpse of the significant work on flow control that is undertaken in relation to the automotive industry. We look forward to the continued interest from this community for this Journal both in terms of quality papers and increases subscriptions through their Institutions.

I would like to personally thank Prof. Krajinovic for his efforts in soliciting all the papers and having them reviewed and revised to meet the standards of the Journal.

Dr. Surya Raghu
Editor
