## EDITOR'S NOTE

---

### Enhancements

The Haworth Press has recently instituted some new procedures to expedite the typesetting, proofreading, and printing of the *Journal of Pharmacy Teaching* and the other journals it publishes. Authors whose articles are accepted for publication should send us two copies of the final version of their manuscript and a matching low-density 5 1/4" or 3 1/2" computer disk of the manuscript in WordPerfect 5.1. Authors who use their computer to prepare tables, graphs, or figures should also submit these materials in separate WordPerfect files; all other artwork must be camera-ready.

Authors are also responsible for securing reprint permissions for artwork or material that has appeared in another source. If you have difficulty meeting these specifications or other questions, please contact me. We believe these new procedures will decrease the production time and increase your enjoyment of the *Journal*.
