

Erratum

Erratum: Posterior shoulder instability following anatomic total shoulder arthroplasty: A case report and review of management

In the article titled, "Posterior shoulder instability following anatomic total shoulder arthroplasty: A case report and review of management" published in pages 131-134, issue 4, vol. 9 of International Journal of Shoulder Surgery^[1], the section, "Declaration of Patient Consent" having the following content went missing due to technical errors:

"The authors certify that they have obtained all appropriate patient consent forms. In the form the patient(s) has/have given his/her/their consent for his/her/their images and other clinical information to be reported in the journal. The patients understand that their names and initials will not be published and due efforts will be made to conceal their identity, but anonymity cannot be guaranteed."

The section having the above content is now incorporated and reposted online.
